

Fabrication and Mechanical Engineering

Company History

Introduction

Lark fme Limited provides an experienced yet cost effective mechanical engineering service. Benefiting from being part of a larger group allows us to call on further expertise in project management, civil engineering and electrical design, manufacture and installation to provide a true "Turnkey" solution no matter how large or small your project.

Evaluation of the continuously changing needs in the market, together with the understanding of the engineering support required to meet those identified needs has enabled *Lark fme* to structure an organisation based on experience, talent and capability which has enabled it to build an enviable client base.

Capable of undertaking design, manufacture and installation in areas such as the Water treatment, Food and Beverage, Pharmaceutical and Packaging industries to name but a few.

Lark fme Limited are able to offer a full solution from conception, through construction, to hand over and provide continuing support for the life of the clients facility.

Key Service Areas

- Steel work design, fabrication and on site erection.
- De-commissioning of plant & equipment.
- Engineering maintenance support.
- Manufacture of material holding bins, conveying systems and ducting.
- Industrial pipe work for steam, gas, water, compressed air, oil and chemicals.
- Plant removal and factory relocation.

Importantly our company has been deliberately structured in order that we can provide the complete resource and maximum flexibility needed to fully satisfy the contractor requirements of our many and varied clients.

Our prevailing culture is always one of understanding and long term partnership, key partners in the continued growth and success of our organisation.

Tel: 01978 666080 Fax: 01978 664538

Co. Reg. No. 6571169 Vat no. 933 8798 69

As a dedicated service company our business is to support the clients and, in placing their trust in **Lark fme**, our clients can be assured of our total commitment and ability to engineer best value solutions in every area of our activities.

Market Place

- Water Industry
- Pharmaceutical Industry.
- Food Processing.
- Packaging Industry
- Energy Management.
- Electronics Industry.
- Paper Industry.
- Plastics Industry.
- Hotel and Leisure Industry.

The above industries represent a major proportion of the UK manufacturing output. The majority of our clients are national and multinational blue chip corporations.

Our niche area within this market place are the medium sized "turnkey" projects. It is unusual for a company within this sector to offer such a broad base of services. Unlike the largest engineering companies, who are geared for major schemes and have high overheads, we can give a fast and flexible response at a lower cost.

HEALTH & SAFETY POLICY STATEMENT

The Company will ensure, so far as reasonably practicable, the health, safety and welfare of all its employees, and the health and safety of other people, including contractors and the general public, who may be affected by the companies activities so to prevent injury, damage to property and the environment.

To achieve the overall objective the company will, so far as reasonably practicable, take steps to ensure the timely identification of hazards and will seek to provide safe plant and equipment, safe systems of work and adequate training, instruction and supervision of all employees.

The company intends that its operations will comply with all relevant legislation and codes of practice. The company will make appropriate arrangements to ensure that it keeps up-to-date regarding both its statutory and other obligations and the hazards likely to be associated with any of its activities.

Signed.

S. Munford

ENVIRONMENTAL POLICY STATEMENT

The Management of Lark fme Limited recognise the known environmental implications of their activities and will cause the operations to be carried out in such a manner as to ensure a high standard of environmental care.

In order to make this intention reality the company will regularly review it's organisation for health and safety with a view to integrating environmental responsibilities into this established framework.

Similarly, the arrangements section of the policy, will reflect not only the hazards and precautions in relation to the protection of the persons but also the environment in which the works are taking place. The company will endeavour to;

- Promote the development of improved standards and methods of manufacture that are energy conscious and utilise material in an efficient manner.
- Cause materials to be handled and disposed of in a manner that does not damage the environment.
- Cause the impact of the company's operations on the environment to be controlled in such a manner that the short and long term effects are reduced to an acceptable level.
- Promote and maintain close relationships with enforcing authorities and environmental organisations as appropriate. Promote environmental awareness in their employees and other persons under their control.

QUALITY POLICY

It is the primary objective of LARK fme Limited to provide a high level of service in the design, manufacture and installation, of pre-fabricated mechanical structures and engineering support services etc. to plc's and local commercial customers.

The Company is committed to a quality system, which provides for the company's needs and complies with the requirements of ISO 9001: 2000 and to continually improving this system and the services we provide.

The company appreciates the value of its staff and employees and their commitment to this policy. In response the company is committed to providing a good and safe working environment and to providing the training and resources for all to both enjoy working for the company and having the opportunities for advancement of their careers, wherever possible within the company.

This policy will be supported by Quality objectives, which will be published and updated regularly.
